COUNTERSEA PLANNING AND EMPLOYMENT

Last Updated: 7 November 2014

Countersea planning and employment of Air Force forces with maritime forces will require close coordination between maritime component planners and air operations center and unit planners. Ironing out the differences in expectations through liaison officers will reduce confusion and distraction while providing synergy, unity of effort, and effective air-sea integration. Employment in the maritime domain is enhanced greatly through integrated service collaboration, collective planning effort, and synchronized coordination in execution.
